The NDPR Academy® Foundation Course:

The NDPR Academy® Foundation Course (the **Foundation Course**) is an introductory programme to Privacy Rights in Nigeria and the 2019 Nigeria Data Protection Regulation (**NDPR**). The following Modules and objectives make up the Foundation Course:

Module	Scope + Objective
Module 1: Introduction to Nigeria Privacy Rights Laws	It introduces participants to the basis of Nigeria's current privacy rights laws in a bid to help them appreciate better the current conversations and laws on Personal Data protection.
Module 2: Principles of Personal Data Collection and Administration	It helps participants understand the nature of Personal Data and the 6 globally recognised principles of data protection and processing in light of the provisions of the NDPR in a bid to help them fully appreciate the principles-based and rules-based requirements of data protection compliance and enforcement under the NDPR.
Module 3: The Rights of Data Subjects	It helps participants understand the nature of the 8 rights of Data Subjects under the NDPR and how the rights are protected and enforced under the NDPR.
Module 4: The Obligations of Data Controllers and Administrators	It helps participants understand the concepts of the Data Controller, Data Administrator and related concepts as the Data Protection Officer, Third Party and Data Protection Compliance Organisation as used under the NDPR; setting out their rules and time-sensitive obligations.
Module 5: Local and International Transfers of Personal Data	It helps participants understand the nature and bases for transfers of Personal Data and the separate rules that govern local and international transfers under the NDPR.
Module 6: Data Protection Compliance Processes – Audits and Impact Assessments	It introduces participants to the concepts of Data Protection Audits (DPA) and Data Protection Impact Assessments (DPIA), highlighting the processes involved in each activity. The aim of the module is to help participants appreciate the functions and opportunities of the 2 compliance processes.

Module 7: NDPR Liabilities, Penalties and Remedies	It helps participants understand the concepts (the how and when) of liabilities, penalties and remedies. It uses international examples to explain the lower and upper levels of NDPR penalties. The aim of the module is to help participants appreciate the cost of non-compliance with the NDPR.

The Foundation Course has been redesigned to be taken both as an online or offline (at the Oriental Hotel, Lagos) programme, giving potential participants the required flexibility for and accessibility to the programme. It is designed as a 7-hours training for a maximum 25 participants per class. The certification assessment is for an additional 1-hour that may be taken at any-time after the training including on the day of the training. The 7-hours class is designed to be interactive as all course materials would have been sent electronically to registered Participants ahead of the class. NDPR Academy® offline classes are paperless. Participants must accordingly come for the class with their laptops. Internet facilities will be made available for the entire duration of the class and certification assessment. The Foundation Course alumnis will additionally be life-long members of the NDPR Academy®, having access to its vast resources on Personal Data protection in Nigeria.

The NDPR Academy® Master Course:

The NDPR Academy® Master Course (the Master Course) is an advanced programme on the NDPR and related laws in Nigeria with a strong bias for global cybersecurity issues. The following Modules and objectives make up the Master Course:

Module	Scope + Objective
Day 1:	
Module 1: Introduction to Information Systems Security	It helps participants understand the:
	i. important Personal Data security concepts such as: identity and access management, incident response, endpoint and server security, cloud security; cloud security alliance guidance; attract strategies and tools; cryptography concepts; encryption and hashing applications; and zero trust model;
	ii. need and processes for business continuity planning (contingency planning) and disaster recovery;
	iii. need and processes for carrying out information security investigations
	iv. governance of processes, roles, strategies, legalities, responsibilities and impact of third parties on information security.
	Participants would be able to deliver relevant polices, standards, guidelines and other cost-effective solutions.

Module	Scope + Objective
Day 2:	
Module 2: Information Security Risks Management	It helps participants understand the best practices for the management of information systems and assets - the common technical security controls available to prevent, detect and recover from security incidents and risks. Certified participants would be able to i. articulate business-related security architectures using available tools, products, standards and protocols; ii. investigate and manage an information security incident and all aspects of a security programme, including reacting to new threats and vulnerabilities, securing operational and service delivery consistent with security polices, standards and procedures, and handling security incidents of all types according to common principles and practices, consistent with legal constraints and obligations; and iii. verify and determine that management measures taken did mitigate identified and managed risks.

The Master Course is designed as an offline programme to be held at the Oriental Hotel, Lagos. It is designed as a 12-hours training for a maximum 25 participants per class. The certification assessment is for an additional 1-hour that may be taken at any-time after the training including on the day of the training. The 12-hours class is designed to be interactive as all course materials would have been sent electronically to registered Participants ahead of the class. NDPR Academy® offline classes are paperless. Participants must accordingly come for the class with their laptops. Internet facilities will be made available for the entire duration of the class and certification assessment. The Master Course alumnis will additionally be life-long members of the NDPR Academy®, having access to its vast resources on Personal Data protection in Nigeria.

The Nigeria Data Protection Concave 2020:

This will be the second instalment of the Interactive Session designed as a parley among the National Information Technology Development Agency (NITDA), other data protection regulators (Government), Data Protection Compliance Organisations, Data Subjects, Data Controllers, Data Protection Officers, Data Administrators and the general public. Similar to 2019, the 3-hourhrs engagement is designed to be highly interactive and chart the course for the future of data protection in Nigeria.
